DETAILS OF THE ACTIVITY

The International Day of Mathematics is 14 March. It is also known as the Pi Day, because the mathematical constant π (pi) can be rounded down to 3.14. March 14 is already celebrated in many countries as Pi Day because that date is written as 3/14 in some countries and the mathematical constant Pi is approximately 3.14. The International Day of Mathematics is a project led by the International Mathematical Union with the support of numerous international and regional organizations. Every year we announce a theme to flavor the celebration, spark creativity and bring light to connections between mathematics and all sorts of fields, concepts and ideas. In 2024 we want to celebrate mathematical games, puzzles and other entertaining activities, but also "playing" with mathematics itself, exploring, experimenting, and discovering.
